

CDC: CUSTOMER DATA CULTURE (DISCOVERY)

{Company Name}
{Project Name}
{Date}

CUSTOMER DATA CULTURE is a short form assessment that empowers your people to provide feedback on operational competence in enabling data across your information ecosystem.

The synthesis of four key Insight Drivers consolidates individual views into an actionable scorecard that will identify process gaps, strengthen communication programs, and enhance customer engagement.

LISTEN TO CUSTOMER

Listening to Customer directly relates to your organisations capability in DATA MANAGEMENT

Customers leave a trail of data with each interaction. How your business copes with the capture, storage, and processing of this information can determine how well you can learn from your data to understand customer needs.

TYPE OF RESPONSE DISTRIBUTION

KEY RESPONSE

Q Does your department capture enough valuable customer data?

NAVIGATION HUB

RECOMMENDATION

With some sound capability in the capture of Customer data, you may wish to extend your reach to gather more Customer information from alternative sources. This can sharpen understanding as to customer needs, improve communication and responsiveness.

ACTIONS

- 1. Close gaps on any internal Customer feedback loops, considering any new communication channels (social, apps, etc.), that may be capturing data but is not easily accessible.
- 2. Consider 3rd party companies or government agencies that hold a complimentary data set to your own which could be used to enrich your data (where deemed commercially appropriate).

KNOWLEDGE OF CUSTOMER

Knowledge of Customer associates with your organisations ability to transform data into insights.

Taking raw data and building an understanding of your customers experience, predicting their future behaviour, and identifying how this relates to your commercial strategy is paramount to learning how best to serve your customers in a way that aligns to your business goals.

KNOWLEDGE OF CUSTOMER

PARTICIPANTS	QUESTIONS ANSWERED	PROJECT {NAME} RESULT	BENCHMARK: SPARCA JEDI	NET VARIANCE	OUTCOME OF RESULT
17	293	67% Established	44%	+23	Based on this initial feedback it appears your business has not considered customer data management to be a priority. We highly recommend that a more detailed Data Management assessment is conducted.

KEY RESPONSE

Q Does your department clearly understand the customer journey?

A

NAVIGATION HUB

RECOMMENDATION

There is opportunity to make a step change to lift your current insight on customers from profiling historical data to a more directed approach covering segmentation, prediction, and advanced intelligence.

ACTIONS

- Review / Define an approach to building on known insights. Establish a set of customer hypothesis statements and validate these assumptions to learn more about the factors that influence the purchase decision.
- Consider the Customer journey from multiple perspectives, acquisition, upsell, retention and winback. This will provide a more holistic view on your customers interrelationship with you and your competitors.

INTERACTION WITH CUSTOMER

Interaction with Customer becomes more effective when customer insights are activated.

Once an organisation has qualified its knowledge of its customers, it can service them with greater precision via the creation of strategic and tactical programs that improve targeting and operational effectiveness.

CULTURE OF CUSTOMER

A strong **Culture of Customer** is paramount to building end to end capability across the information ecosystem.

Cultivating a strong culture enables an organisation to build a narrative around how they want the market to perceive them, both as an employer of choice and a provider of customer solutions.

Result Distribution by Participant

Results Context

Based on this initial feedback it appears your business has not considered customer data management to be a priority. We highly recommend that a more detailed Data Management assessment is conducted.

CDC DISCOVERY DISTRIBUTION OF RESPONSES

Through the **Distribution of Responses** we can discover the more **polarized promoting or deprecating outcomes** to key questions.

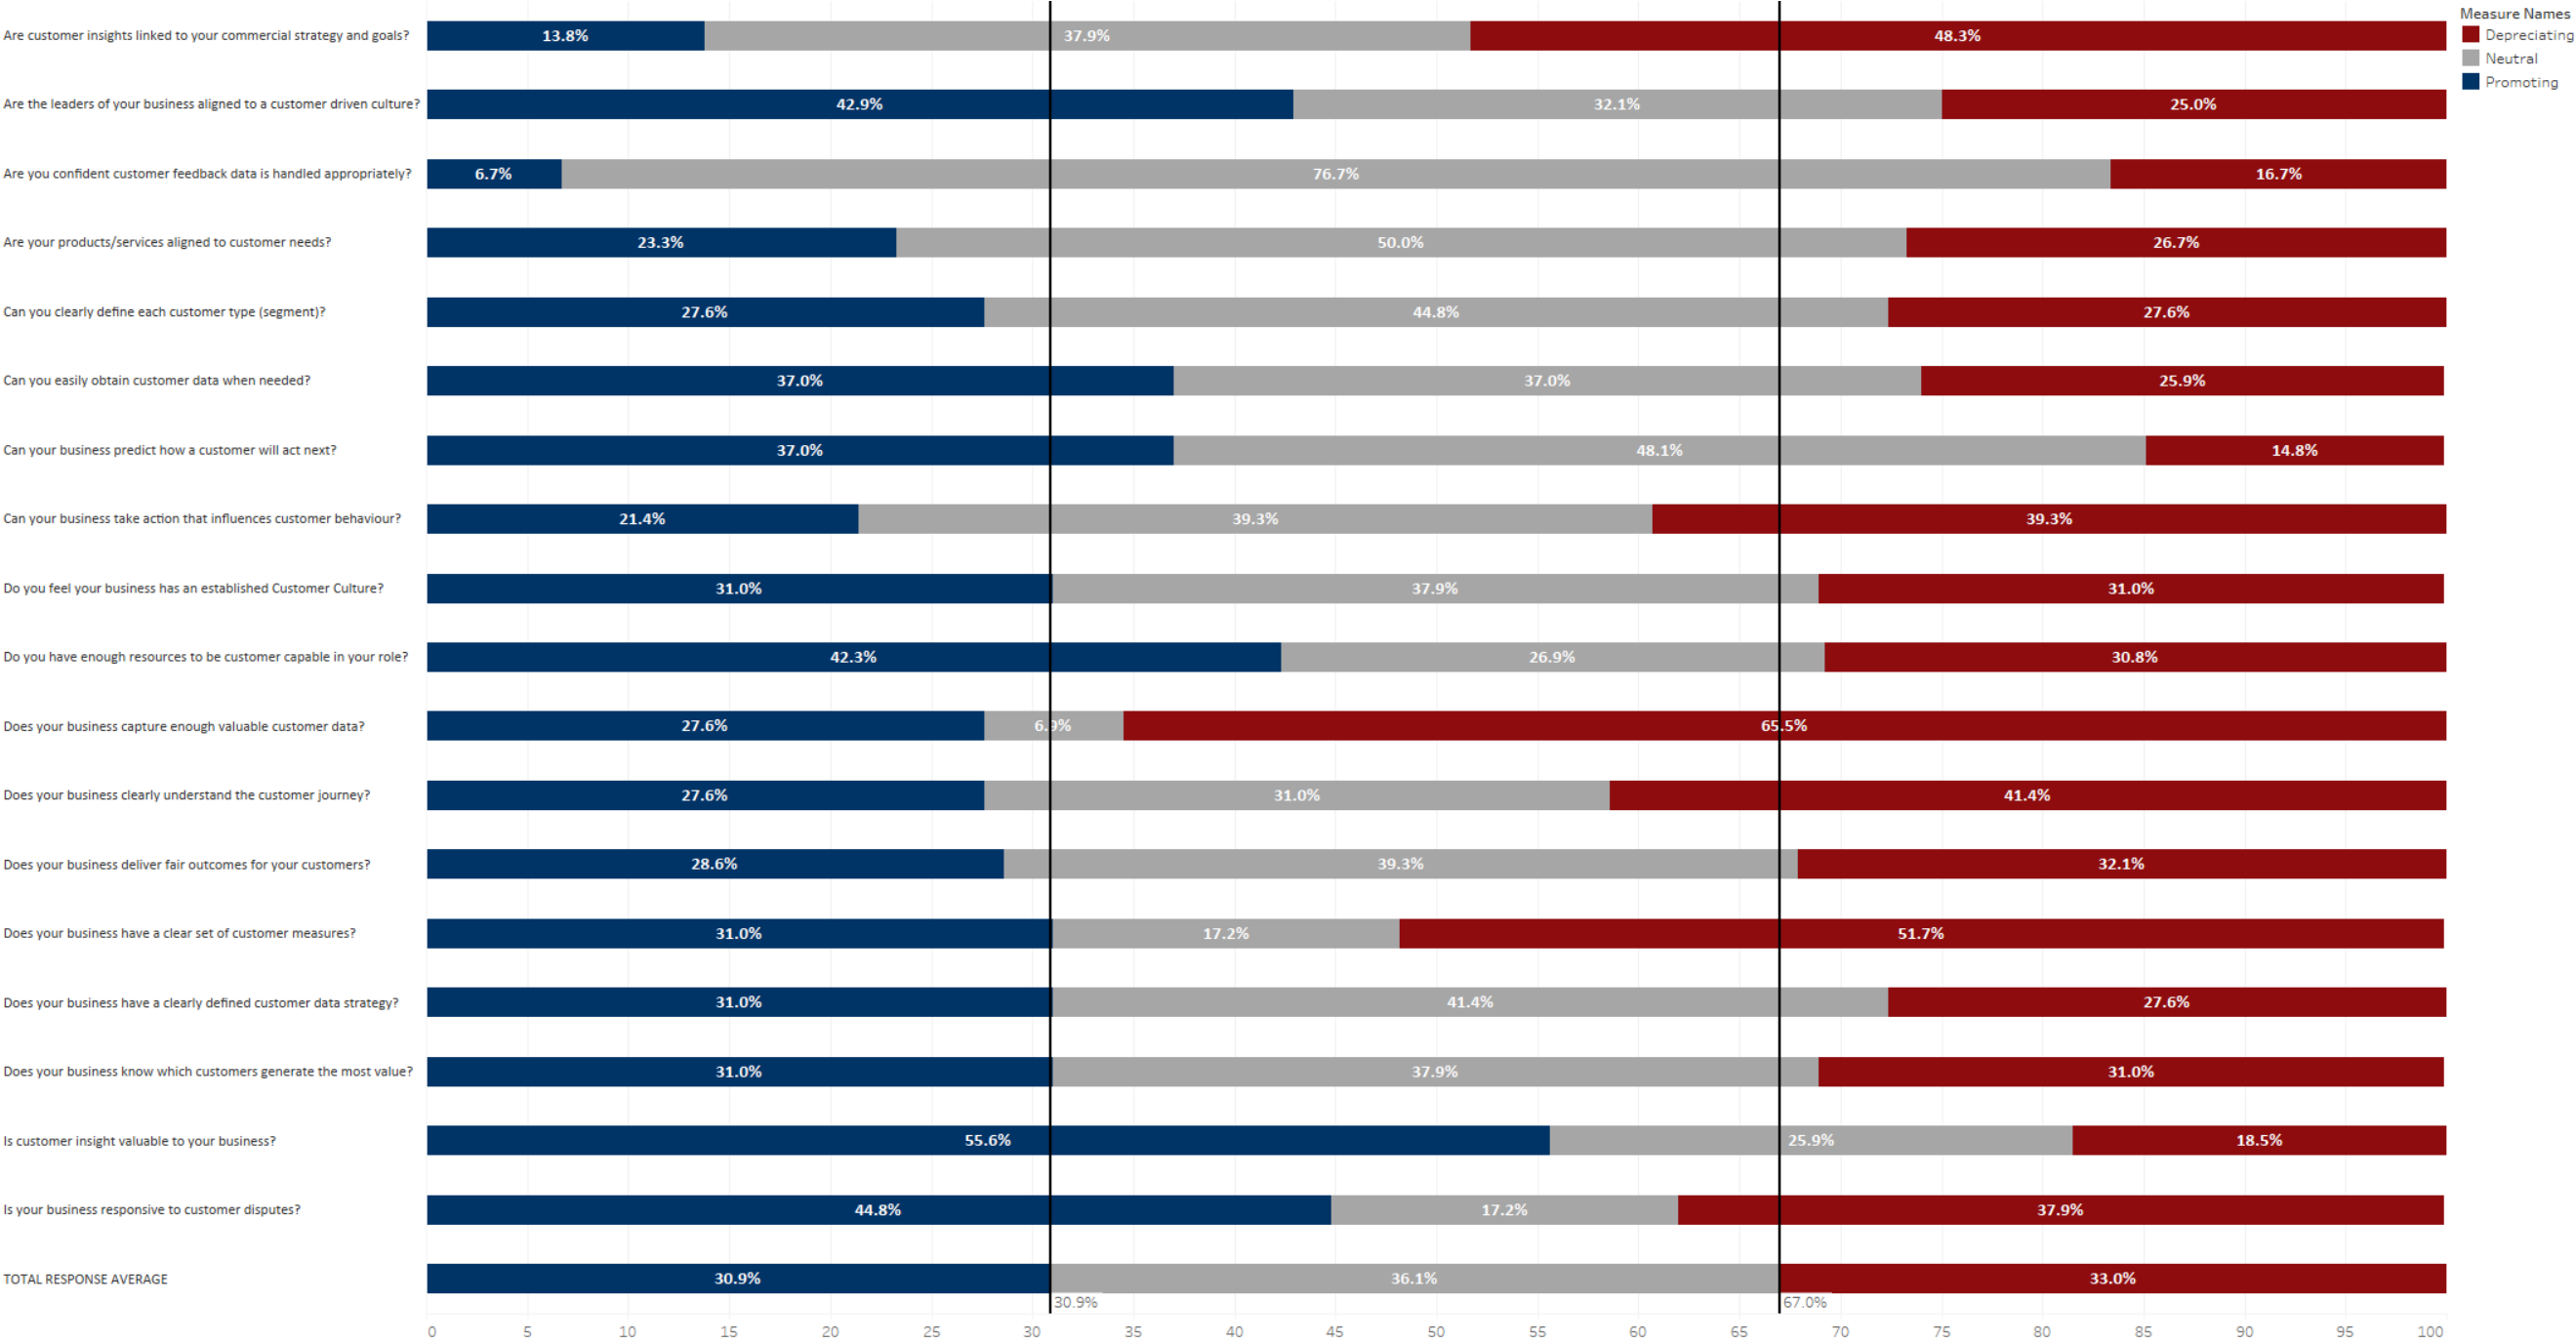

Considering the distribution of response by question can be informative but lacks context to other answered questions and can bias the derived insight. It is recommended to consider response based at Insight Driver or dimensional view.

CDC DISCOVERY INTER-RELATIONSHIPS

The below Venn diagram is intended to provide an overarching view of the inter-relationship between each Insight Driver of the CDC DISCOVERY classification.

DATA MANAGEMENT directly relates to effectiveness on how data is stored and processed; ANALYTICAL CAPABILITY infers how well data is assessed and transformed to be released to the business, finally INSIGHT ACTIVATION provides a view on the value of insight, to be consumed for strategic planning or actioned for immediate use in tactical programs.

These results on their own can help you identify the areas where further investigation and effort is required. In contrast, the overlap areas can indicate friction points, which could reflect process or communication inefficiencies.

FRICTION POINTS

Analysis Driven Culture (LISTEN 54% / KNOWLEDGE 34%):

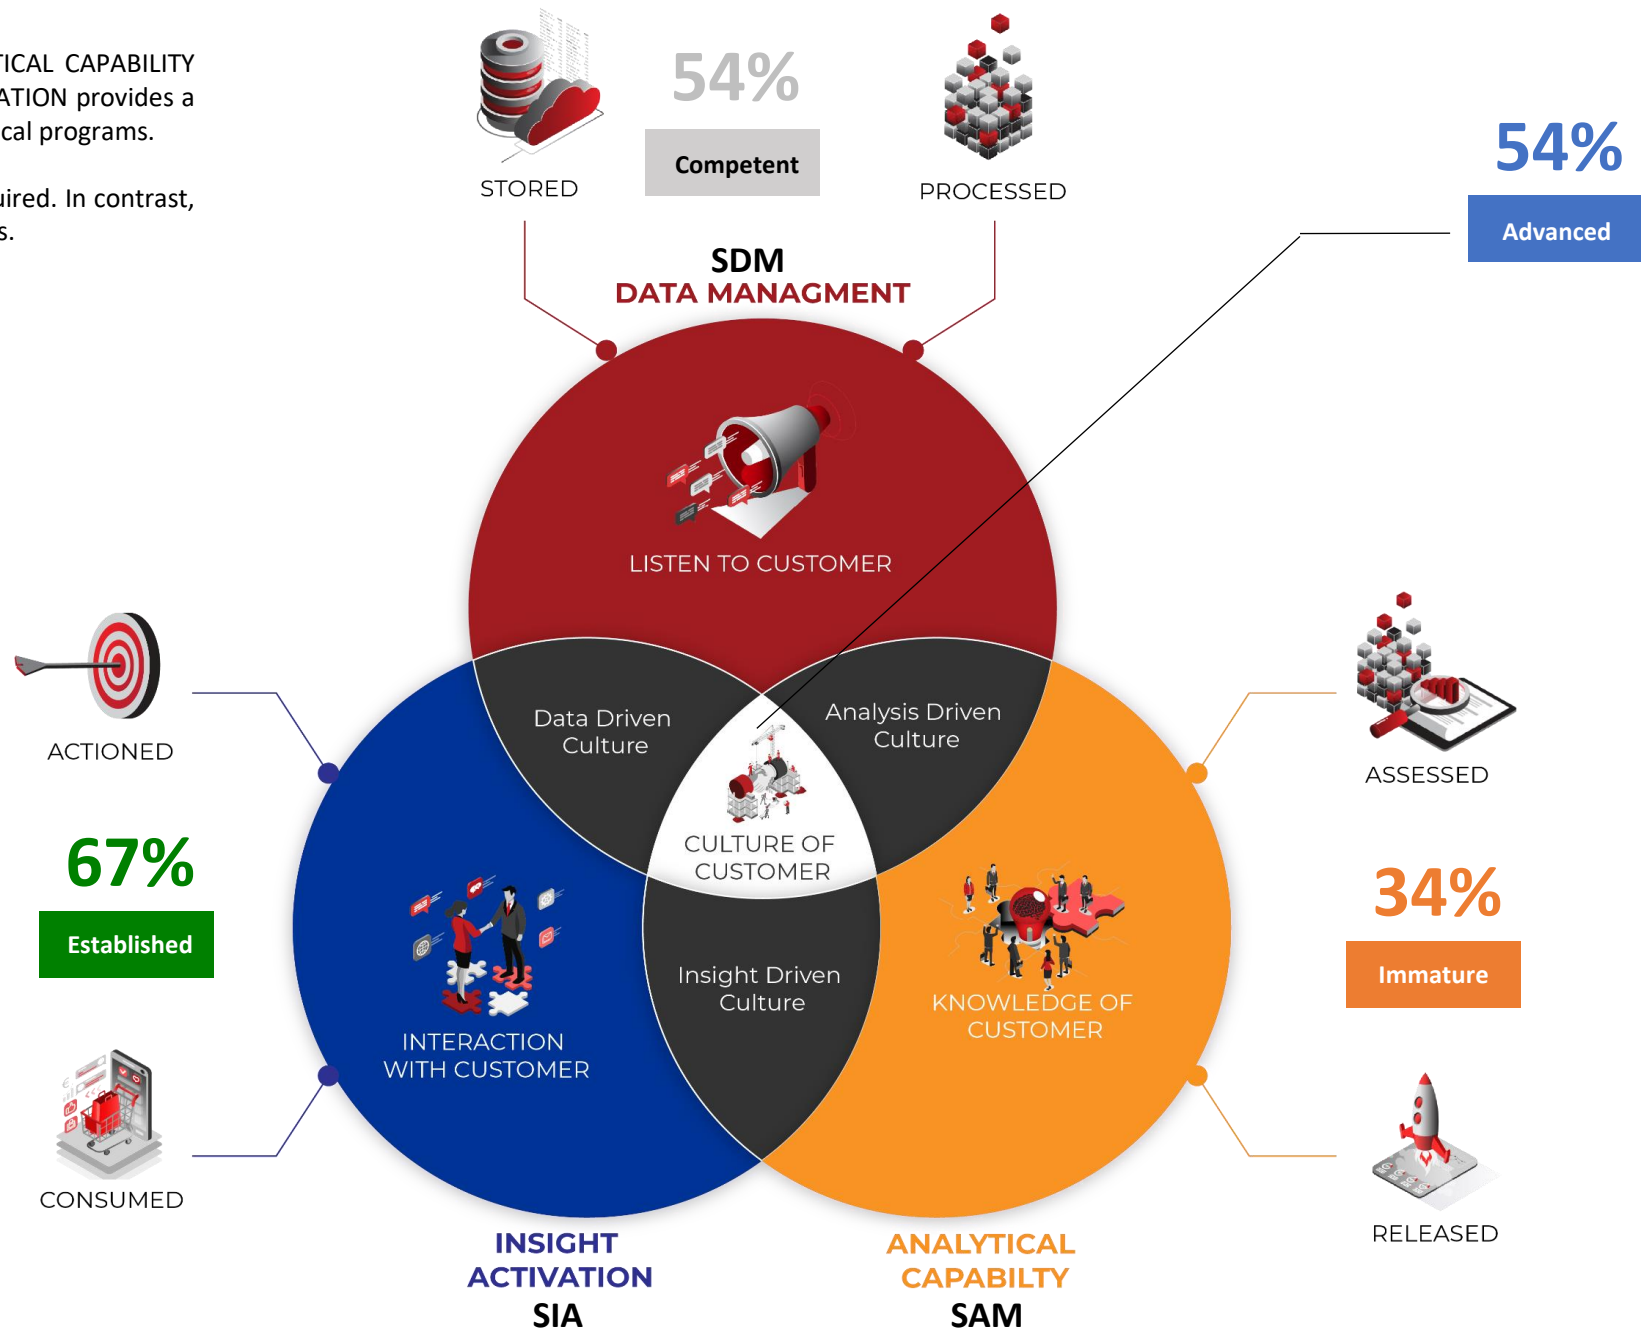

This is the point of where data is transformed into insights. When working optimally data is clearly understood, is regularly available, and of high quality.

▪ **Insight Driven Culture (KNOWLEDGE 34% / INTERACTION 67%):**

Is the point of effective translation of data into insights. It must be structured to communicate in a format that supports strategic decisions or enables insight lead actions.

▪ **Data Driven Culture (INTERACTION 67% / LISTEN 54%):**

Working effectively the business is capturing customer interactions, processing this data, and provisioning to the insights team or tools at speed. This allows enables a more effective response time to customer needs.

CDC DISCOVERY RECOMMENDATIONS

A strong **Culture of Customer** is paramount to building end to end capability across the information ecosystem.

Cultivating a strong culture enables an organisation to build a narrative around how they want the market to perceive them, both as an employer of choice and a provider of customer solutions.

TACTICAL RECOMMENDATIONS

With some sound capability in the capture of Customer data, you may wish to extend your reach to gather more Customer information from alternative sources.

This can sharpen understanding as to customer needs, improve communication and responsiveness.

There is opportunity to make a step change to lift your current insight on customers from profiling historical data to a more directed approach covering segmentation, prediction, and advanced intelligence.

With some sound capability in the capture of Customer data, you may wish to extend your reach to gather more Customer information from alternative sources.

This can sharpen understanding as to customer needs, improve communication and responsiveness.

There is a challenge to lift the 'Customer' conversation across your organisation, this will require a complete review of the Customer data you collect, the customer insight generated, and the customer strategy mandate.

TACTICAL ACTIONS

1. Close gaps on any internal Customer feedback loops, considering any new communication channels (social, apps, etc.), that may be capturing data but is not easily accessible.

2. Consider 3rd party companies or government agencies that hold a complimentary data set to your own which could be used to enrich your data (where deemed commercially appropriate).

1. Review / Define an approach to building on known insights. Establish a set of customer hypothesis statements and validate these assumptions to learn more about the factors that influence the purchase decision.

2. Consider the Customer journey from multiple perspectives, acquisition, upsell, retention and winback. This will provide a more holistic view on your customers interrelationship with you and your competitors.

1. Review / Define an approach to building on known insights. Establish a set of customer hypothesis statements and validate these assumptions to learn more about the factors that influence the purchase decision.

2. Consider the Customer journey from multiple perspectives, acquisition, upsell, retention and winback. This will provide a more holistic view on your customers interrelationship with you and your competitors.
